## Introduction

Brick Fabrication Limited is a leading manufacturer of prefabricated products for the UK house building and construction industries.

Brick Fabrication offer a wide range of products and services for the construction industry. We can manufacture and fabricate products off site to your requirements and specification.

This brochure demonstrates some of the services and products provided by Brick Fabrication.

Benefits of using Brick Fabrication off site fabrication include:-

- Fabrication of any brick or block type and collected from site to guarantee a perfect colour match.
- Quick turn around.
- Economical off site fabrication and cost saving compared to on site fabrication.
- Fabrication to your specification and requirements.
- In house design team providing design services and manufacturing drawings.

## Services

2

At Brick Fabrication we offer a full estimating and quantities investigation from site drawings and a site call off service for products as you require them.

Contact us to discuss your requirements.

## Block Lintels

Brick Fabrication is pleased to offer an innovative option to those construction companies using paint grade/fair faced blockwork in commercial developments for creating a clear opening in blockwork.

A quick, simple and easy to install block lintel giving a pleasing clean appearance in blockwork for contracts that call for an untreated block finish, such as schools, hospitals, prison, stadia etc.

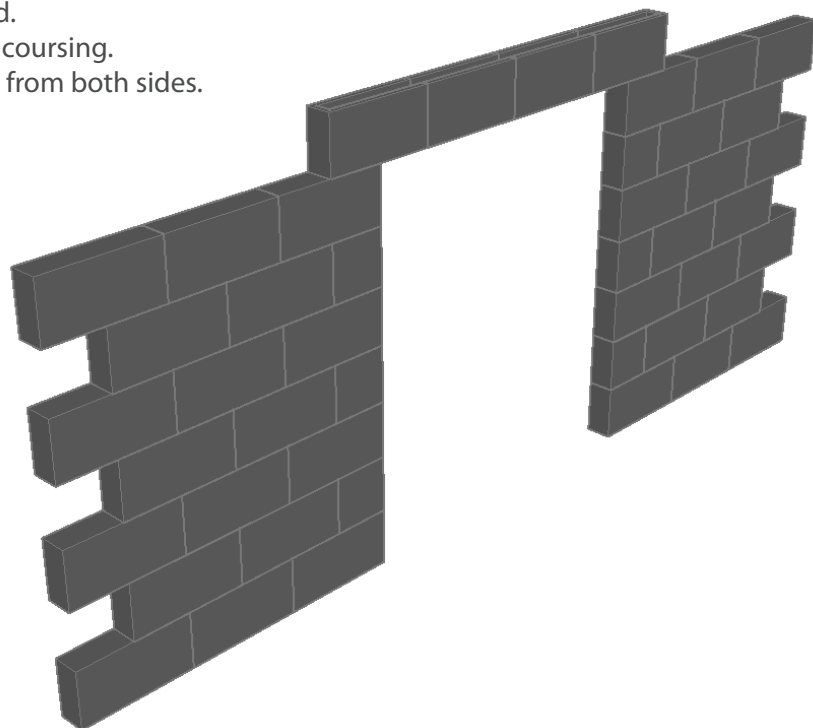

The block lintel is a self supporting lintel made from concrete blocks with a groove cut along the length of the block which is filled with high strength concrete and appropriate re-bar. The appearance is of continuous blockwork from both sides, which matches the surrounding blockwork.

Brick Fabrication has developed the technique for cutting blocks to create block lintels and a method statement for the practical manufacture of block lintels for a variety of openings.

Full technical specification is available on request.

Benefits of Brick Fabrication Block Lintels include:

- Quick and easy to install.
- Lifting eyes incorporated on request.
- No further lintel required.
- Fits with standard block coursing.
- Good visual appearance from both sides.

## Visually Aided Steps

Brick Fabrication can provide tactile and hazard warning paving solutions. These are fabricated to your requirements using block paving collected from site. Step treads can be provided in many colours and thicknesses, and positioned to your specification.

Steps can also be cut to required sizes, angles and chamfers to install on site.

## Bricklite

The Bricklite panel system is a quick and easy installation solution for building brick work in difficult situations. Brick slips are adhered into a lightweight composite glass reinforced polymer panel, and cut to shape and size to allow for a quick and water tight installation.

Bricks can be collected from site to ensure a perfect match and the Bricklite panels can be cut to size and shape as required.
