

Thames

Brick Clad Chimney Stack

The brick clad stacks have a Glass Reinforced Plastic (GRP) sealed core and is then clad in real brick, stone or render prepared. Brick clad stacks allow for almost any finishing detail and can be clad to match the house build exactly. Brick clad chimneys come with lifting eyes for a quick and easy to intallation on site.

Chimney options shown here as a 40° mid ridge roof position stack, with no corbel detail with standard capping and a single 300mm pot. For full product details and available options please see the Brick Fabrication Brick Clad Chimney brochure or visit www.brickfabrication.co.uk.
